ALEX SANTOS

QA Engineer | API Testing | Web Tooling

Metro Manila, PH (UTC+8) | al39726867@gmail.com | +63 928 7884723
github.com/alex-s4 | linkedin.com/in/alex-santos-1b6767195 | Portfolio

SUMMARY

QA Engineer with hands-on experience in manual and API testing, SQL-based defect investigation, and building small internal tools in JavaScript and PowerShell. Currently testing a live sports betting platform full-time; looking for part-time, project-based, volunteer, or freelance QA and web development work. Strong in sports betting and fantasy sports domain knowledge. Currently learning JMeter for performance testing.

Availability: Weekday evenings and weekends | UTC+8 | Remote only

SKILLS

Testing	Manual, smoke, and regression testing; test planning and case design; defect reporting and triage
API and data	Postman (collections, scripting, chained requests), REST APIs, cURL, SQL (Oracle, PostgreSQL), DBeaver
Debugging	Server log analysis (Tomcat/Linux), HTTP traffic inspection with Wireshark, API-level bug reproduction
Tools and tracking	Jira, Zephyr, Confluence
Development	JavaScript, Node.js, Express, HTML/CSS, PowerShell, Java (bootcamp level)
Learning	JMeter (writing and running test scripts); test automation with Playwright, Cypress, and Selenium WebDriver (foundations)

EXPERIENCE

QA Engineer | LotusLabs Inc. — Mar 2026 – Present

- Write test cases and log defects in Zephyr and Jira for a multi-environment sports betting platform
- Reproduce and diagnose bugs at the API level using Postman and cURL, backed by SQL queries on Oracle and PostgreSQL and Linux/Tomcat log analysis
- Maintain reusable Postman collections with scripted token extraction and chained requests for repeatable regression and debugging runs
- Built a Node.js/Express and Oracle data explorer and a PowerShell WinForms tool that creates events through REST APIs, cutting down repetitive manual setup
- Learning JMeter: writing and running test scripts for performance testing

Gametime Support Specialist | Sourcefit Inc. — Sep 2023 – Mar 2026

- Handled customer queries on match results and betting markets during live U.S. sporting events
- Supported the scoring team with real-time play-by-play, league news, and injury monitoring

Software QA / L1 Helpdesk Support | LotusLabs Inc. — Oct 2021 – Sep 2023

- Executed test plans and cases against requirements and reported defects to developers
- Joined daily stand-ups and sprint reviews to coordinate testing with the dev team

PROJECTS

Draftlab | HTML, CSS, JavaScript, Cloudflare Workers, Gemini API | **Work in Progress** — Live demo

- Developing an AI draft-analysis feature (server-side Gemini API) to help Mobile Legends players understand why a draft works and plan around win conditions, bans, and next picks
- Completed the live site on Cloudflare Workers: 133-hero library, equipment and emblem references, draft sandbox, guided match review with exports, pro-match archive, and strategy playbook; API protected with Cloudflare Turnstile and rate limiting
- Next milestone: deploying the AI analysis and expanding test coverage (Node.js test runner)

Scoring Calculator / Box Score and Results Fetcher | JavaScript, HTML, CSS — Live demo

- Web app that calculates fantasy scores from player stats using a configurable scoring chart, and fetches box scores and results

Portfolio — Live site

- Personal site showcasing projects, tools, and QA work

EDUCATION

- BS Electronics Engineering, Universidad De Manila (2018); Licensed Electronics Engineer
- Java Full Stack Web Development Bootcamp, Coding Dojo PH (2023)
